

Running For State Office

If you are interested in running for a particular position, we encourage you to contact the current board member for information on the position in question.

Anyone planning on running for office needs to be able to attend all House of Delegates meetings and the "old and New BOD orientation" session.

Candidates nominated from the floor

A. Individuals who become interested in running for state office during the convention are encouraged to run from the floor. Persons anticipating nomination from the floor are not permitted to campaign prior to being nominated, and are not permitted to release any campaign materials until such time.

B. A candidate nominated from the floor must give his/her application for state office and supporting credentials for eligibility to a member of the Nominations and Elections Committee. These documents must be verified prior to being nominated.

C. Candidates who are transferring schools, and graduates of associate degree and diploma schools who are planning to enter baccalaureate programs, must have written proof of acceptance to the new school.

D. Candidates may be nominated from the floor at either of the business meetings on Thursday for any elected office. At the last business meeting on Thursday, only positions with fewer than two (2) slated candidates will be available for nomination from the floor. Nominations will be closed after the last business meeting on Thursday.

Write-in Candidates

Although not permitted to campaign, write-in candidates are allowed. Write in candidates must obey all rules of Campaign Regulations and Ethics. Write-in candidates must meet eligibility requirements as specified in the ANSA bylaws.

Candidates as delegates

The ANSA Board places no restriction on the dual of candidate-delegate.

Candidates' biographies

Each candidate's application form will be available for inspection throughout the convention and will be posted in Campaign Headquarters. Candidates on the slate will be presented in the appropriate ANSA publication.
